*Lab results can vary from test to test on the same outsole sample. Results shown were provided to SR Max by the footwear manufacturer and were conducted on red quarry/olean tile . Slip resistant shoes are only part of an overall safety program. No shoe can protect you from injury in all situations. No shoe is "slip proof." It is possible to slip and fall when wearing slip-resistant shoes. All slip-resistant shoes are used in environments where hazards exist beyond the scope of protection a safety shoe can offer. It is possible for you to be injured even if you are wearing personal protective equipment such as slip resistant shoes. All products are sold subject only to the warranties given by the manufacturer. If this product is marked as meeting an ANSI or ASTM standard, then the product carries a manufacturer's warranty. Saf-Gard Safety Shoe Company/SR Max Slip Resistant Shoes (the "Company") provides no express warranty and expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for any particular shoe.
